BUI AI DUC

Developer Intern

aiduc0602@gmail.com | (+84) 943-312-704 | **My Portfolio**

CAREER OBJECTIVE

An Information Technology student with hands-on skills in web development and building Java-based APIs. Passionate about backend development and eager to gain real-world experience to become a proficient developer or technical specialist.

EDUCATION

UNIVERSITY OF INFORMATION TECHNOLOGY (UIT)   **2022 – Present**

- Bachelor's degree in information technology (Undergraduate – Last year student)
- Major: Web Technology

PROJECTS

1. Project Title: Product Management System [Github][DEMO]

Date: June 2025 – July 2025

Description: Built RESTful APIs for product management with CRUD, search, pagination, and sorting. Used JPA and HQL for database access, ensuring clean, modular code for scalability.

Responsibilities & tech stack:

- Built RESTful APIs with **Spring Boot, JPA, HQL, and PostgreSQL**
- Implemented **CRUD, search (criteria-based filtering, HQL), pagination, and sorting.**

2. Project Title: User Management System [Github][DEMO]

Date: May 2025 – June 2025

Description: Built RESTful APIs for user management with CRUD, search, pagination, and sorting. Used JPA and HQL for database access.ensured clean, modular code for scalability, validated data, and implemented basic exception handling.

Responsibilities & tech stack:

- Built RESTful APIs with **Spring Boot, JPA, HQL, and PostgreSQL.**
- Implemented **CRUD,search (criteria-based filtering, HQL), pagination, and sorting**.

SKILLS

- **Technical Skills:**Java core, Spring boot, HQL, JPA, SQL, My SQL, Postgre SQL.
- **Soft Skills:** Logical thinking, Eager to learn, Attention to details, Teamwork, Analytical and Problem-solving skills.
